## D&L 180 Degree Swing Blade versus other Swing blades or Band Saws Mills?

- **D&L 180 Degree Swing Blade** has the capability of a 180 degree blade swing.
- **D&L 180 Degree Swing Blade** offers a diesel powered motor with hydrostatic drive so there is no gear box.
- **D&L 180 Degree Swing Blade** has it's own built in edger which allows the operator to cut the log and edge all the lumber in the log with out turning the log
- **D&L 180 Degree Swing Blade** no log turning .

- **D&L 180 Degree Swing Blade** offers an insertable tooth blade so the can be quickly and easily changed in the field with very little down time.
- **D&L 180 Degree Swing Blade** rails will break down into 10 foot section for unmatched portability.
- **D&L 180 Degree Swing Blade** provides an optional electric adjustment system
- **D&L 180 Degree Swing Blade** has independent adjustment feet on the rails, Allowing for unsurpassed speed of mill set up.
- **D&L 180 Degree Swing Blade** cost of doing business with the mill is \$1.00 a day for your saw teeth and 4 to 5 gals of fuel in 8 hrs.
- **D&L 180 Degree Swing Blade** , blades sharpen on the mill usually twice a day versus every 1 to 1.5 hours such is the case on a Bandsaw mill producing a cost of a min 25.00 a day as the bands are only good for 6 to 8 sharpening
- **D&L 180 Degree Swing Blade** mill comes with the diamond sharpener and jig.
- **D&L 180 Degree Swing Blade** comes with a multi catch system that allows the operator to set the blades at different degrees . This option allows the operator to actually cut a 6 sided cants from the log with no log turning.
- **D&L 180 Degree Swing Blade** comes with a bevel siding attachment.

- **D&L 180 Degree Swing Blade** off the shelf parts
- **D&L 180 Degree Swing Blade** teeth exist out of the bark kicking the dirt off the outside of the log . This deletes the debarking of the logs before cutting
- **D&L 180 Degree Swing Blade** saw guards swing with the blade . This safety feature keeps the one side of the blade always guarded when double cutting.
- **D&L 180 Degree Swing Blade** can double cut with out removing any saw guards , or lifting the head off of the rails and turning the head 180 degrees to cut back.
- **D&L 180 Degree Swing Blade** Can be ordered with sae or metric set works
- **D&L 180 Degree Swing Blade** smooth accurate cut with + or - 1/16" accuracy and NO WAVEY CUTS.
- **D&L 180 Degree Swing Blade** produces a shaving not a sawdust which can be sold for animal bedding
- **D&L 180 Degree Swing Blade** 180 degree swing blade action allows for the ease of double cutting
- **D&L 180 Degree Swing Blade** using this mill will allow the operator to cut  $\frac{1}{4}$  sawn lumber
